Research Interests

My research focuses on advancing Neuro-Symbolic AI to improve the scalability and efficiency of automated reasoning systems, while enabling AI models to develop reasoning and verification capabilities. Beyond foundational research, I design specialized Neuro-Symbolic methods to enhance software reliability, including modern AI systems, and explore verifiable code generation to make software development more trustworthy and error-resistant.

Employment

2024–Present **Assistant Professor**
The University of Virginia (UVA), Department of Computer Science

Education

2018–2024 **Doctor of Philosophy**, *The University of Texas at Austin (UT Austin)*
Research Areas: Software Engineering, Formal Methods, Machine Learning
Advisor: Sarfraz Khurshid

2017 **Master of Philosophy**, *The University of Melbourne (UoM)*
Research Areas: Automated Logical Reasoning
Thesis: A Bit-Vector Solver Based on Word-Level Propagation **[PDF]**
Advisor: Peter J. Stuckey and Harald Sondergaard

2014 **Bachelor of Engineering**, *Dalian University of Technology (DUT)*
Major: Computer Science and Technology
Advisor: Yanming Shen

Publications

Published *16 refereed conference papers and 2 refereed journal papers*. My papers were accepted at top-tier venues in software engineering (ICSE, ESEC/FSE, ASE, ESEC/FSEDemo), formal methods (TACAS, SAT), programming languages (PLDI), machine learning (ICLR) and automated reasoning (CPAIOR, JAR)

Patents

[19] Amit Goel, Dejan Jovanovic, Neha Rungta, **Wenxi Wang**. (alphabetical order) *"Optimizing SMT problem encoding for application-specific workloads with machine learning."* *U.S. Patent Application, Pending*, 2023.

Internship Experiences

5/2022–8/2022 **Applied Scientist Intern**, *Automated Reasoning Group*, Amazon Web Services
Host: Dejan Jovanovic
Project: Optimizing SMT problem encoding for application-specific workloads with Graph Neural Networks

5/2019–8/2019 **Research Intern**, *Software Quality & Security Lab*, Fujitsu Research of America
Host: Hiroaki Yoshida
Project: Automated program repairs for static analysis violations

9/2017–8/2018 **Research Intern**, *Department of Computing*, Hong Kong Polytechnic University
Host: Max Yu Pei
Project: Mutation-based fault localization with minimal unsatisfiable core analysis

Scholarships and Awards

2023–2024 George J. Heuer, Jr. Ph.D. Endowed Graduate Fellowship, UT Austin
2022 MIT EECS Rising Stars
2014–2016 Melbourne International Research Scholarship, UoM
2014–2016 Melbourne International Fee Remission Scholarship, UoM
2014 Province Excellent Graduates Award, Liaoning Province, China (top 1%)
2012–2013 China National Scholarship, Ministry of Education of China (top 1%)
2010–2014 Outstanding Student Awards, DUT (top 3%)

Teaching Experiences

Lecturer:

Fall 2025	Machine Learning for Software Reliability (CS6501), graduate Level, UVA
Spring 2025	Software Testing (CS3250), undergraduate Level, UVA
Fall 2024	Machine Learning for Software Reliability (CS6501), graduate Level, UVA

Teaching Assistant:

Fall 2022	Software Testing (ECE 360T), Undergraduate Level, UT Austin
Spring 2020	Software Testing (ECE 382C), Graduate Level, UT Austin
Fall 2019	Software Design & Implementation II (ECE 422C), Graduate Level, UT Austin
Spring 2019	Algorithmic Foundations for Software Systems (ECE 382V), Graduate Level, UT Austin
Fall 2016	Data Structure & Algorithms (COMP20003), Undergraduate Level, UoM
Fall 2016	Engineering Computation (COMP20005), Undergraduate Level, UoM

Guest Lecturer:

Fall 2024	Computer Science Perspectives (CS 6190), Graduate Level, UVA Content: Introduction to improving software reliability
Fall 2023	Software Testing (ECE 382V), Graduate Level, UT Austin Content: Introduction to automated vulnerability repair in cloud access control
Fall 2023	Verification & Validation of Software (ECE 382C), Graduate Level, UT Austin Content: Introduction to model counting and enumeration with Alloy analyzer
Spring 2019	Algorithmic Foundations for Software Systems (ECE 382V), Graduate Level, UT Austin Content: Java coding demonstration of classic data structures

Mentoring Experiences

PhD	Zichen Xie, Lize Shao (2025–Present, UVA)
Master	Derek Joseph Hansen (2025–Present, UVA)
Master	John Edwin Berberian (2025–Present, UVA)
Master	Chaitanya Rajendra Shahane (2024–Present, UVA)
Undergraduate	Carter Opperman (2024–Present, UVA)
Undergraduate	Jamie Hazel Fulford (2024–Present, UVA)
Internship	Tianyi Huang (2024–Present, University of Illinois Urbana-Champaign)
Internship	Jiate Li (2024–Present, Nanyang Technological University)
Internship	Zhonghan Wang (2024–Present, Chinese Academy of Sciences)
Master	Sicong Che (2022–Present, UT Austin, co-authored paper [**?**])
Master	Jiayi Yang (2019–2024, UT Austin, co-authored papers [9, **?**])
Ph.D. Student	Muhammad Usman (2019–2021, UT Austin, co-authored papers [10, 11, 12, 13, 14])
