

How We Shall Work Together

CS 3250
Software Testing

Responsibilities of Instructor

Come to class on time, prepared to share knowledge and expertise

Prepare useful, interesting knowledge and make it available to you

Offer challenging but reasonable assignments and assessments

Grade fairly without bias, and return graded work promptly with educational comments

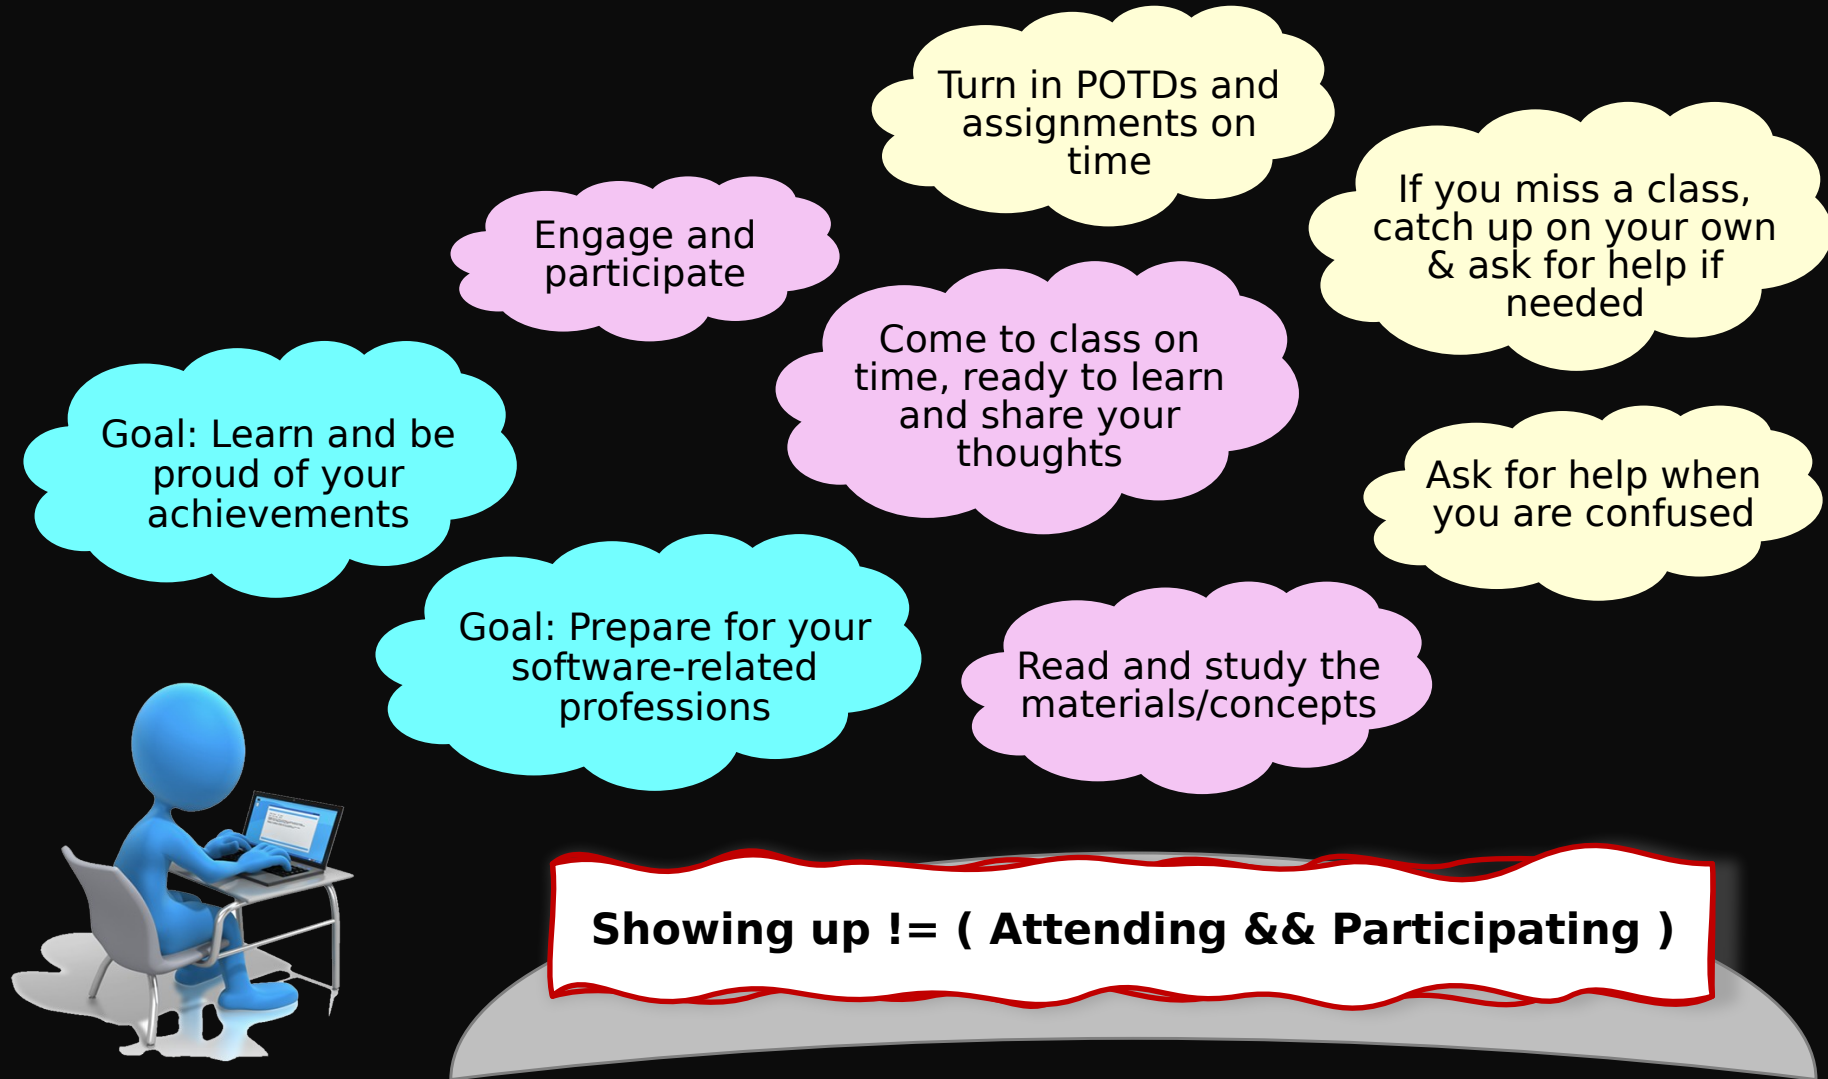

Goal: Support discussion & knowledge sharing of important concepts

Goal: Make the learning environment welcoming & engaging

Responsibilities of Students

[Ref: image by <https://www.pngwing.com>]

Inclusive and Safe Space

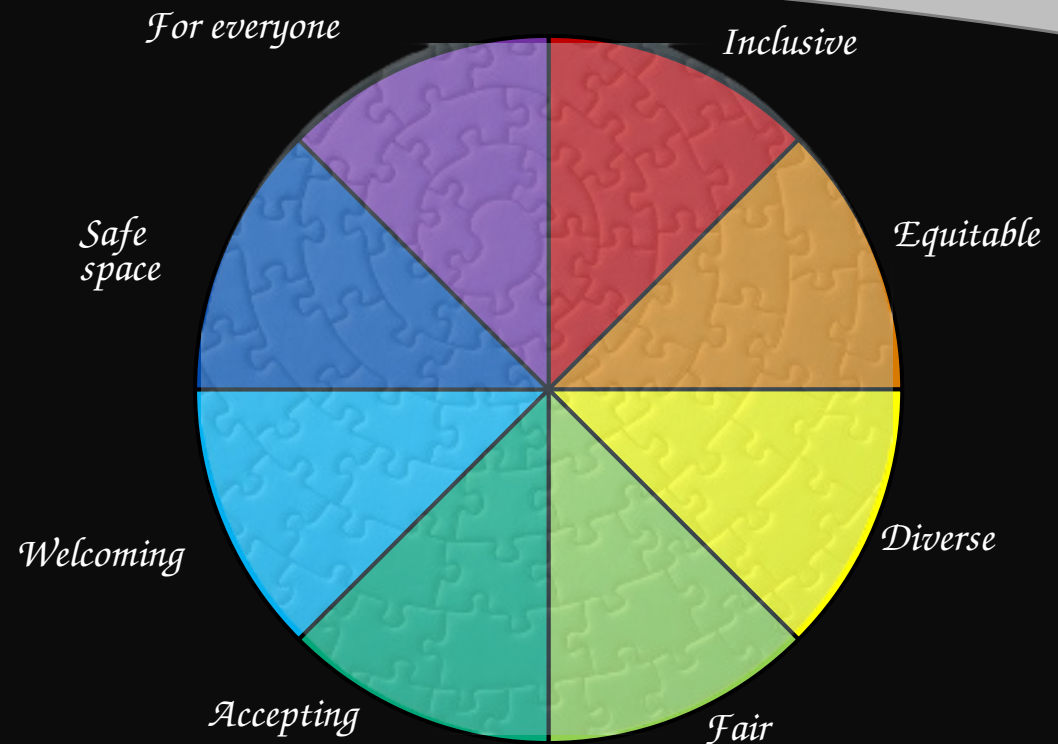

Learning environment = students + TAs + instructor

We all play a role in creating a **safe learning environment**

Everyone should feel comfortable & supported by fellow classmates and instructor

There is **zero tolerance** for

- Racism or sexism
- Bullying or harassment
- Inappropriate behaviors of any kind

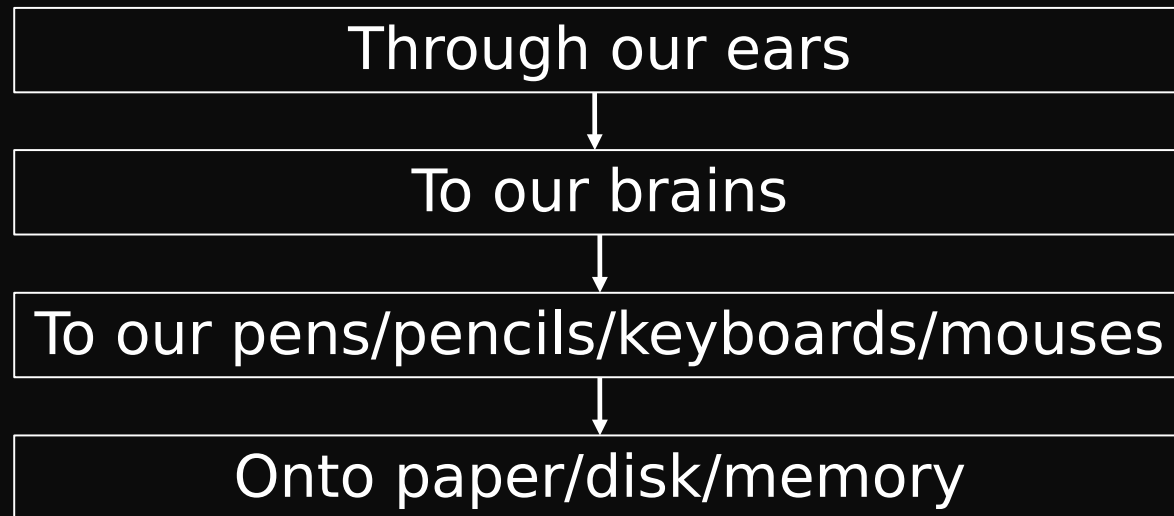

Taking Notes

The slides summarize the material

The words we discuss in class provide the details

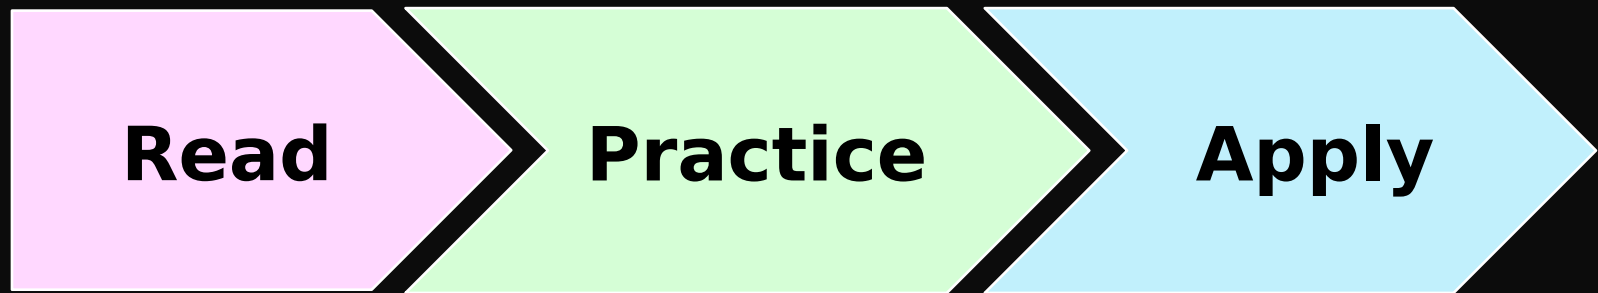

We learn a lot by transferring information

Unless you have a perfect memory, I expect you to take notes on what we discuss 😊

Reading + Practicing + Applying

- Books have knowledge
- Instructors are your guides
- **Information**: comes from lectures
- **Knowledge**: comes from books and assignments
- **Skill**: comes from hands-on activities, POTDs, and assignments
- **Wisdom**: comes from experience

“You” are the Main Driver!!

“You” are the main driver of your learning success.

Your engagement and participation is the most important aspect of your learning experience.

You are encouraged to do all the activities, try all concepts, experience all frameworks ... and do beyond the course's minimum requirements!!
